

**Detroit Speed, Inc.**  
**Universal Seat Slider Mount Kit**  
 P/N: 010111

Detroit Speed's Universal Seat Slider Mount Kit is CNC machined from 6061 aluminum and includes push button quick release pins. The seat mount slider track comes with laser engraved numbers to quickly identify your seat position with up to 7-1/2" of seat adjustment. This kit is sold individually per seat.

Item	Description	Quantity
1	Seat Mount Slider Track	2
2	Seat Mount Slider Bar	2
3	Seat Mount 3/8" Thread Insert	4
4	Push Button Quick Release Pin	4
5	Instructions	1

**WARNING:** This kit is not intended for street/highway use vehicles.

**NOTE:** This is a universal kit and it is not a direct fit for any specific vehicle. You will need to fabricate a floor structure based on your vehicle to properly install this kit.

## Installation:

1. Bolt both of the seat mount slider bars to your seat brackets using the provided 3/8" thread inserts or the 5/16" thru bolt inserts depending on your seat design. Place the inserts in the slider bar so one of them fits in the slot while the other one fits into one of the 5 holes in the slider bar (Figure 1).

Figure 1 - Place Inserts into Slider Bar

2. Bolt the slider bars and inserts to your seat bracket using 3/8"-24 hardware.
3. Once you have fabricated a floor structure into your vehicle, you can install the seat mount slider tracks into the vehicle. Bolt the slider tracks to the floor structure using 3/8"-24 countersink bolts.
4. Place the seat into the slider tracks. Use the push button quick release pins to locate your seat. 2 of the quick pins will go on each side of the seat. The slider track has laser engraved numbers so all 4 quick pins will go in the corresponding matching holes.

If you have any questions before or during the installation of this product please contact Detroit Speed at [tech@detroitsspeed.com](mailto:tech@detroitsspeed.com) or 704.662.3272
